MIP200 POWER CONTROLLER

McIntosh[®]

SINCE 1949

Sound is not just the DNA of McIntosh, it is the heartbeat that resonates within every product we bring to life, connecting music lovers to the soul-stirring power of sound. Join us on a journey to elevate your sound experience.

PROTECT YOUR AUDIO SYSTEM

Safeguard your premium home audio system with the MIP200 Power Controller, a sophisticated solution for protecting your audio investment from unexpected electrical issues. Ensure that your cherished audio components remain unscathed by power disturbances such as surges from a lightning strike, overvoltage incidents, and brownouts.

The MIP200 provides superior AC power protection with advanced line-to-neutral protection, utilizing a thermally protected metal-oxide varistor (TPMOV) to eliminate the common failure modes found in standard MOVs. In addition to surge protection, the MIP200 offers electromagnetic interference

(EMI) filtering and programmable over/under voltage protection. This sophisticated protection system automatically switches off the outlets when unsafe voltage levels are detected and turns them back on only when the voltage is restored to safe operating levels.

The MIP200 is available with either 4 Type B (NEMA 5-15R) outlets with 2 receptacles each (above), or 4 Type F (CEE 7/3 or “Schuko”) outlets with 1 receptacle each (below).

ACCOMMODATES
VARIOUS POWER
STANDARDS

Designed to accommodate various global power standards, the MIP200 is available with either 4 Type B¹ (NEMA 5-15R) outlets with 2 receptacles each, or 4 Type F¹ (CEE 7/3 or “Schuko”) outlets with 1 receptacle each.

An always-on, unswitched outlet ensures continuous power to critical components, while the remaining outlets can be managed via the front panel, remote operation through the rear panel Power Control or RS232 ports,

or configured as additional always-on outlets. Programmable delays for each outlet minimize inrush current, ensuring a safe startup for all connected devices and reducing the risk of tripping a circuit breaker.

SEAMLESS INTEGRATION

The MIP200 is designed for seamless integration into custom install home theater or whole-home audio systems. Its 2U rack-mountable form factor ensures easy installation, making it a perfect fit for any high-end audio setup.

This design not only saves valuable space but also allows for a clean, organized system layout, enhancing both functionality and aesthetics.

This thoughtful design perfectly complements our range of custom install amplifiers and A/V processors, offering both functionality and aesthetic appeal.

SOPHISTICATED DESIGN

The MIP200's front panel AC line monitor provides real-time data on input voltage, current draw, and total apparent power, offering peace of mind and precision control.

Encased in the iconic McIntosh black glass front panel with aluminum trim, illuminated logo, and

aluminum control knobs, the MIP200 exudes luxury and sophistication.

Contact your local McIntosh dealer to discover how the MIP200 can protect your home audio or home theater system.

Footnotes:

1) As defined by the International Electrotechnical Commission.

MIP200
SPECS

ELECTRONIC SPECIFICATIONS

Input Rating

With Type B receptacles:
100 - 120V 50/60Hz 12A (Max)
With Type F receptacles:
220 - 240V 50/60Hz 6A (Max)

Output Rating

With Type B receptacles: 11.6A (1160W)
With Type F receptacles: 5.8A (1275W)

AC Surge Suppression

50 kA - 8/20µs Line to Neutral

GENERAL SPECIFICATIONS

AC Surge Suppression Type

Thermally protected metal-oxide varistor (TPMOV) for Line to Neutral protection

Number of Receptacles

With Type B receptacles: 8
With Type F receptacles: 4

Number of Always ON Receptacles

With Type B receptacles: 2
With Type F receptacles: 1

Number of Programmable Receptacles

With Type B receptacles: 6
With Type F receptacles: 3

WEIGHTS & DIMENSIONS

Dimensions (W x H x D)

With Type B receptacles: 17-1/2" (44.45cm) x 4-3/8" (11.1cm) x 15-9/16" (39.5cm)
With Type F receptacles: 17-1/2" (44.45cm) x 4-3/8" (11.1cm) x 15-23/32" (39.9cm)

Unit Weight

17 lbs (7.7kg)

Shipping Weight

33 lbs (15 kg)

McIntosh®

About McIntosh

McIntosh Laboratory, Inc. is the premier American designer and manufacturer of high-fidelity audio equipment.

Founded in 1949, McIntosh products are handcrafted by experts passionate about creating an unmatched sonic experience. From its factory in Binghamton, New York to all corners of the world, the McIntosh blue meters have become a symbol of quality audio and continue to own the premiere position in home audio entertainment for discerning

listeners. Powering events like President Lyndon Johnson's inauguration speech, world-renowned concert systems like Woodstock, the Grateful Dead's Wall of Sound and Despacio, McIntosh has shaped some of the most important moments in music and culture. McIntosh gives music enthusiasts the power to create their ultimate sound experience.

For the Consumer's Protection

In order to ensure the highest level of customer satisfaction, new McIntosh products may only be purchased from an Authorized McIntosh Dealer; and, with certain limited exceptions may only be purchased over-the-counter or delivered and installed by the Authorized McIntosh Dealer. McIntosh does not warrant, in any way, products that are purchased from anyone who is not an Authorized McIntosh Dealer, or that have had their serial numbers altered or defaced.
